PROFESSIONAL OVERVIEW

Software Engineer with experience developing web, mobile, and cloud-integrated applications using modern front-end frameworks, mobile technologies, and AWS services. Background in building scalable software solutions, improving developer workflows, and translating business requirements into maintainable technical implementations.

Strong experience across Flutter, Angular, JavaScript ecosystems, cloud infrastructure, API integrations, UI/UX collaboration, technical documentation, and Agile software delivery. Interested in high-impact engineering environments, scalable product development, distributed systems collaboration, and remote global teams.

SKILLS

- Languages: JavaScript, Dart, Python, SQL, C++, C#
- Frontend: React.js, Angular, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- Mobile: Flutter, Dart
- Backend / APIs: Node.js, Express.js, REST APIs, JSON, XML
- Cloud / DevOps: AWS Lambda, API Gateway, AWS Amplify, Docker, Kubernetes, Git
- Databases: MySQL, MongoDB, SQL Server
- Developer Tooling: GitHub, GitLab, Bitbucket, Vite
- Analytics / BI: Power BI, Tableau, Excel
- Design / Product: Figma, Adobe XD, Photoshop, Illustrator
- Methodologies: Agile, Scrum, Kanban, Code Review, Technical Documentation

WORK EXPERIENCE

SOFTWARE DEVELOPER | Spark Technologies JUNE 2025 – PRESENT

- Designed and implemented new software modules and feature enhancements for business-critical systems, contributing to platform scalability, maintainability, and operational efficiency.
- Collaborated cross-functionally with engineering, product, and UI/UX stakeholders to translate business requirements into production-ready technical solutions.
- Improved engineering workflow quality through Git version control, code reviews, Agile delivery practices, and development standards adoption.
- Authored and maintained technical documentation supporting onboarding, knowledge transfer, and long-term system sustainability.
- Investigated, analyzed, and resolved complex technical issues, contributing to software reliability and development velocity.
- Supported continuous improvement initiatives through debugging, solution design, and collaborative engineering practices.

Tech Stack: Git, Agile, Frontend Development, Technical Documentation, Software Engineering

Web & Mobile Developer | Fixer MX JULY 2024 – DEC 2024

- Developed hybrid mobile applications using Flutter and Dart, delivering user-facing functionality and improving application usability.
- Built serverless automation workflows with AWS Lambda, reducing manual operational overhead and supporting scalable backend execution.
- Optimized service communication architecture using AWS API Gateway to improve API performance, security, and maintainability.
- Redesigned and deployed a production web platform using Angular + AWS Amplify, enhancing responsiveness, accessibility, and front-end performance.
- Integrated frontend and backend systems to strengthen application scalability and software maintainability.

Tech Stack: Flutter, Dart, Angular, AWS Lambda, API Gateway, AWS Amplify, JavaScript

Technical Instructor | TECNOLOchicas JULY 2024 – JUNE 2025

- Designed and facilitated technical workshops focused on HTML, CSS, and JavaScript with emphasis on practical software development skills.
- Created educational resources, coding exercises, and interactive technical content to improve learner engagement and applied understanding.
- Delivered debugging support, mentoring, and personalized programming guidance in remote learning environments.
- Adapted instructional strategies across multiple technical proficiency levels to maximize learning effectiveness.

EDUCATION

Bachelor of Computer Systems Engineering | Instituto Tecnológico de Mexicali 2020 - 2024
Programming Technician | CECYTE BC Plantel Compuertas 2017 - 2020

CERTIFICATIONS

AWS Academy Cloud Foundations
Google UX Design Certificate
Google Data Analytics Certificate

LANGUAGES

Spanish — Native
English — C1 Professional Working Proficiency
